

TRACKING & TELEMATICS

Mini Asset Tag

The PB705 is an asset-tracking device designed to help prevent valuable items from being stolen. It uses a crowdsourced network to determine location, eliminating the need for a SIM card to provide accurate location data worldwide. The device includes a 3M double-sided adhesive tape and can also be paired with a magnet for attachment to metal surfaces, allowing versatile mounting options. It can be easily placed in a car, suitcase, or any desired location. Additionally, it features a built-in buzzer that emits sound to help locate valuables if they are misplaced or stolen. Its small form factor allows for discreet placement in any suitable spot.

Outdoor Asset Tracking

Auto Finance

Personal Item Tracking

Low Power Consumption

The internal battery powers the device for up to 36 months of operation.

Global Availability

Operates globally without relying on cellular networks, removing frequency limitations.

Wide Operating Temperature

Performs well in temperatures between -20°C and +70°C.

Flexible Installation

Can be mounted with 3M tape, directly embedded, or magnet-attached to metal surfaces.

Geo-Fence Alert

Set a virtual boundary on the platform to receive alerts for entry or exit.

IP68 Rated Dust and Water Resistance

Effectively protects against dust and short-term water exposure, ensuring durability in outdoor environments.
